

Environmental Land Stewardship Principles Order

Presented by:

Erica Chung, Commission Strategic Advisor

Chipper Maney, Environmental Program Manager

Introduction

- Guidance to evaluate trade-offs
- Balances Port operations with natural resource stewardship
- Consistently applied Port-wide for all types of land use
- Stewardship benefits communities and the environment
- Stewardship approach is comprehensive

Land Stewardship Benefits

Principles

1. Use a comprehensive approach to environmental land stewardship, including trees, forest, and other habitat.
2. Integrate land stewardship into infrastructure planning and design.
3. Apply an equity and environmental justice lens
4. Support community partnerships and leverage inter-governmental coordination and Port funds to improve stewardship outcomes.
5. Use a holistic ecological approach to stewardship to ensure trees, forest, and other habitat are healthy and self-sustaining.

Strategies

1. Adopt the SEA Land Stewardship Plan
2. Adopt SEA Tree Replacement Standards
3. Integrate land stewardship into existing Maritime programs
4. Update the Sustainable Evaluation Framework

Thank You!
