Subject: Contacts within the Cities to connect with on resumption of Port's single-family sound insulation program

Joe, Brian and Michael –

The Port of Seattle's single-family sound insulation program will resume this summer for eligible homeowners in Seatac, Burien and Des Moines. C&S Engineers has been retained by the Port for program management and they, as a first step, would like to have the opportunity to meet with city staff to begin to familiarize themselves with building and construction inspection practices in each of the three cities.

Can each of you identify the appropriate staff representative or representatives that C&S Engineers can get in touch with to set-up a meeting? Port staff will attend the meetings as well. C&S Engineers will be in town on June 18 and 19 and available for meetings on both dates.

Thank you and please let me know if you have any questions.
