13 MAY 1983

Ms. Lynn Taylor  
Director of Planning and Research  
Port of Seattle  
P.O. Box 1209  
Seattle, WA 98111

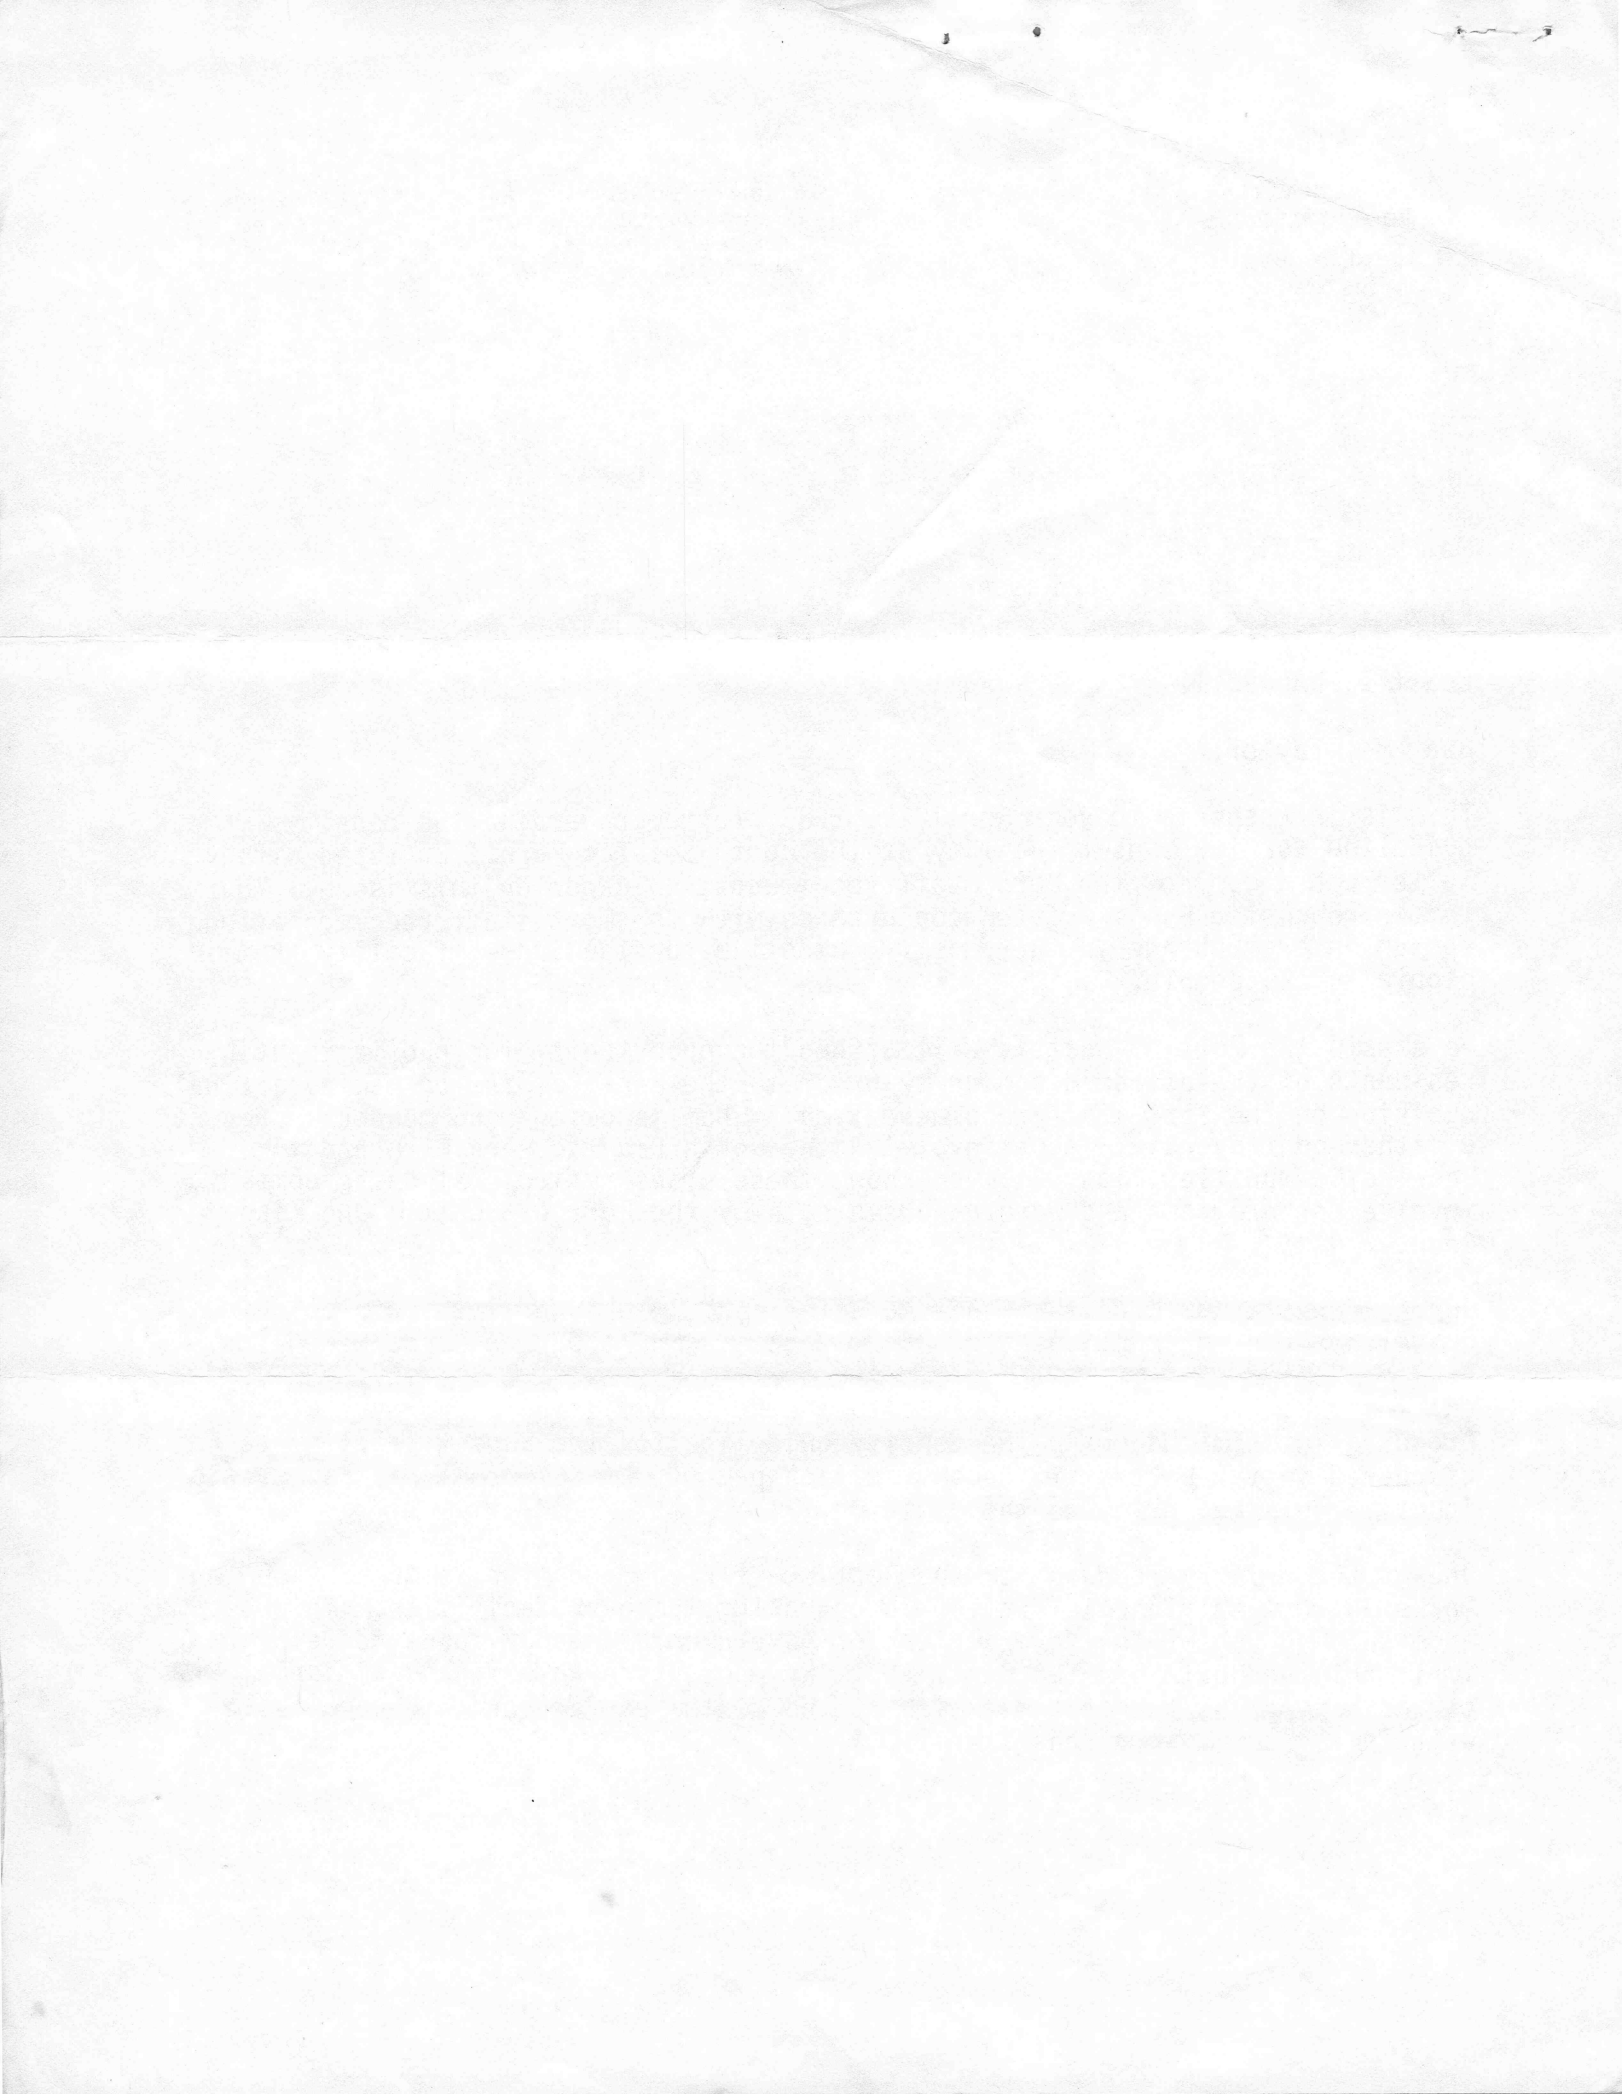

Dear Ms. Taylor:

This is in response to your April 29, 1983, letter regarding the density guideline for the Sunset facility at the North Sea-Tac Park. Enclosed with your letter was a copy of the Port staff recommendation paper on this issue. Your letter requested FAA's written concurrence with the Port staff recommendation for an interim change in the density guideline for the Sunset facility from 60 people to 120 people.

We assume the Port of Seattle will afford the opportunity for public input by residents of the affected community prior to the Port Commission making a final decision on the Port staff recommendation. What is being recommended represents a rather controversial issue involving the North Sea-Tac Park Plan and the Sea-Tac Communities Plan. As you know, these plans reflect extensive community involvement programs and were endorsed both by the Port of Seattle and King County.

Our preference would be that consideration for any change in the density guidelines for the North Sea-Tac Park be done as part of the Noise Remedy Program Update project which includes a comprehensive community involvement program. However, we do not object to the Port Commission's approval of the proposed interim change in the density guideline for the Sunset facility as discussed in the Port staff recommendation paper. We do recommend that public input be obtained prior to the decision.

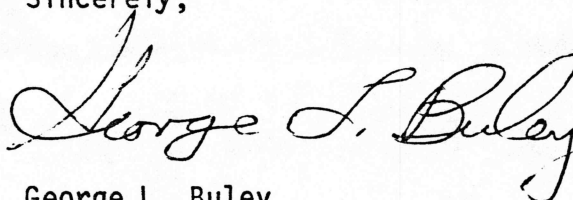

One of the primary reasons for the Port staff recommendation is to provide the Parks Board with financial relief in operating the park facilities. This became an issue because of the general lack of governmental agency funds to help implement the North Sea-Tac Park Plan. We appreciate this financial issue, but our main concern is that activities at the North Sea-Tac Park are compatible with the airport operations.

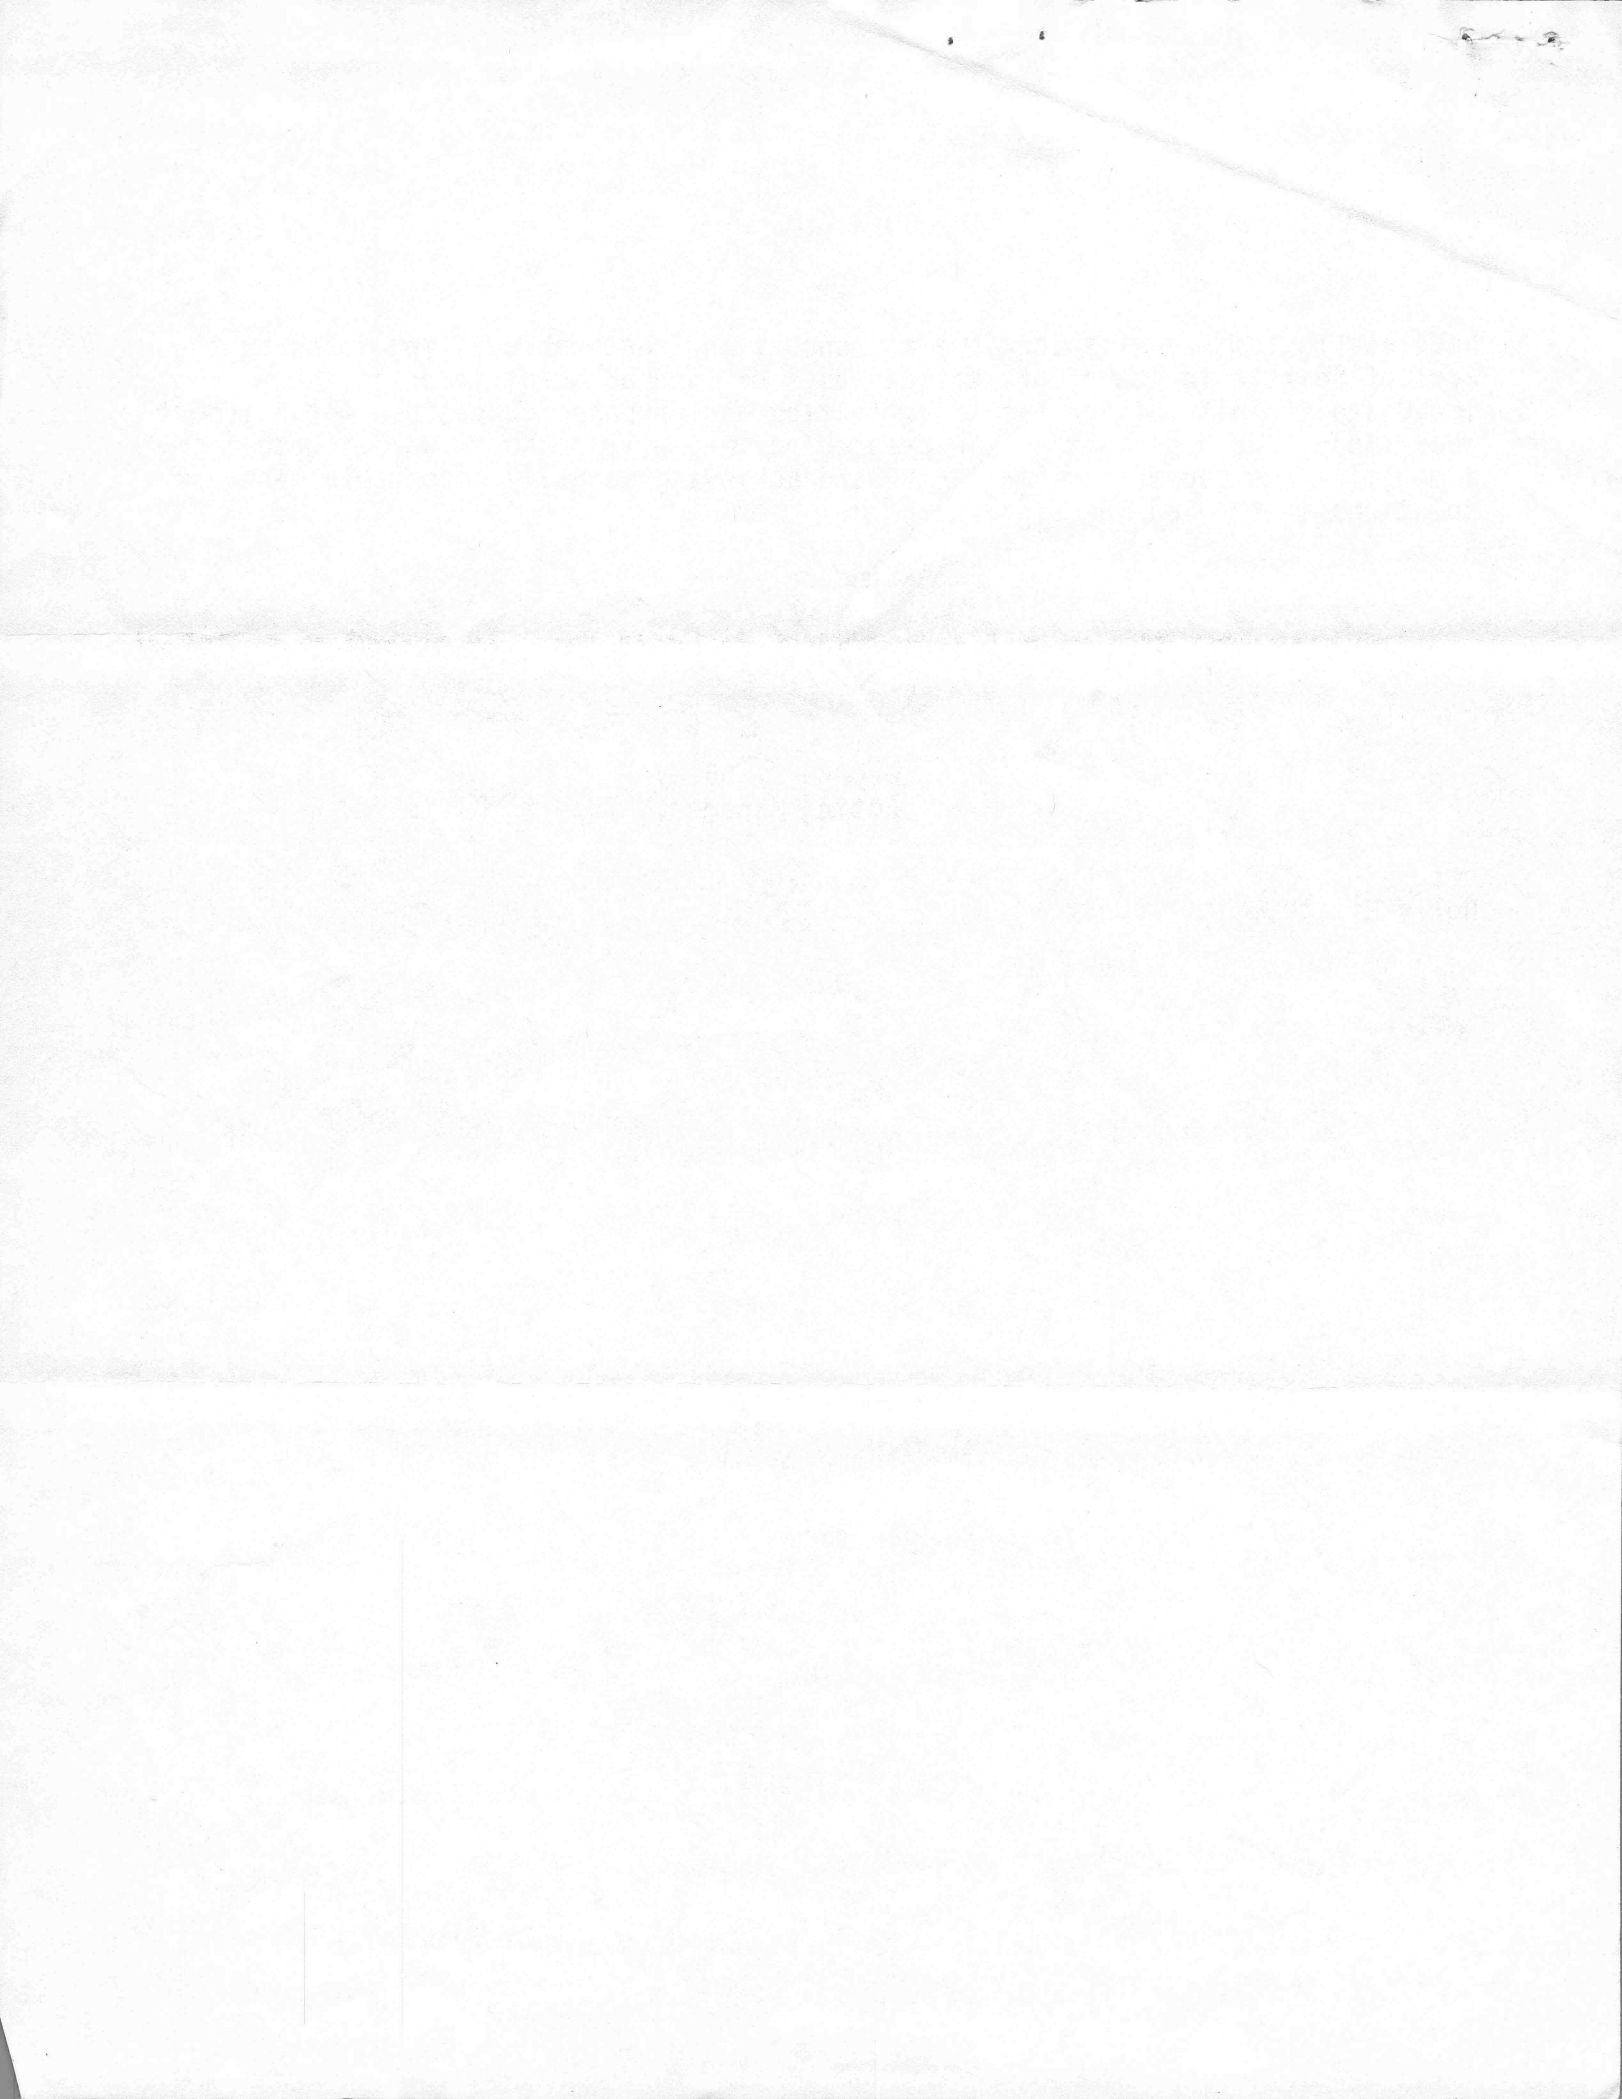

Needless to say, we will continue to support any reasonable action taken by the Port of Seattle in its effort to keep uses of land adjacent to or in the immediate vicinity of Sea-Tac to activities and purposes compatible with airport operations. We hope that all interested parties will begin to work together in a positive and cooperative manner toward achieving mutually acceptable land use solutions in the Sea-Tac area.

Sincerely,

A handwritten signature in cursive script that reads "George L. Buley". The signature is written in dark ink and is positioned above the typed name and title.

George L. Buley  
Acting Manager, Airports Division

**MAY - 2 1983**

On Friday, March 18, 1983, Robert O. Brown, Manager, Airports Division, retired from the Federal Aviation Administration due to health problems. This came unexpectedly, and we are now in an adjustment and transition phase. Edward Tatum will take over as Division Manager in early May. Ed served as Assistant Division Manager for a short time after the new region was formed, and prior to that was Planning and Programming Branch Manager in the Rocky Mountain Region.

Other recent personnel changes:

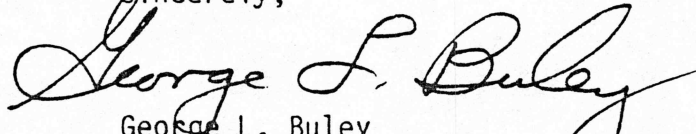

- a. George Paul has been selected and is now on board as the Manager of the Safety and Standards Branch. He comes to us from the Western-Pacific Region in Los Angeles.
- b. Jim Houghton has been transferred from Denver where he was Assistant Manager to be Manager of the new Airports District Office in Helena, effective May 15, 1983. This office will provide expanded services for practically all airport functions.

Current division policies and procedures will continue in effect. For any airport matters in the states of Colorado, Utah, or Wyoming, please contact the Denver Airports District Office. Concerning any airport in Montana, please contact the Helena Airports District Office. For airports in Idaho, Oregon, or Washington, contact the Airports Division. Effective May 9, the Airports Division will be relocated to the FAA Regional Office Building across from Sea-Tac International Airport. Enclosed is a roster of division employees, routing symbols, phone numbers, and addresses.

We are planning a recognition dinner for Bob Brown in the near future and will notify you when a date has been set.

In closing, we look forward to working together in our continuing efforts to improve and enhance the airports in the Northwest Mountain Region.

Sincerely,

  
George L. Buley  
Acting Manager, Airports Division

Enclosure

P.S. Please continue to use present Division phone numbers until May 9, 1983.

FEDERAL AVIATION ADMINISTRATION  
 NORTHWEST MOUNTAIN REGION  
 AIRPORTS DIVISION

ADDRESS: FAA, Airports Division, ANM-600  
 17900 Pacific Hwy S.

Clerk (Typing)	Nancy A. Schrowang	ANM-600b	431-2650

PLANNING AND PROGRAMMING BRANCH - ANM-610

The Branch's primary goal is to assist in the planning and development of a national system of airports for the states of Idaho, Oregon, and Washington. This involves federally funded planning projects, environmental assessments, airspace analysis, compatible land use, aircraft noise impact, and interpretation and application of the programming policies and procedures. Branch personnel are available to advise in the improvement of airports at any level of development.

Manager, Planning and Programming Branch	George L. Buley	ANM-610	431-2633

SAFETY AND STANDARDS BRANCH - ANM-620

This is the principal element of the division for the administration of several important aviation-related programs for the states of Idaho, Oregon, and Washington. Perhaps the primary, or most visible, efforts are centered around airport certification and ground safety, airport engineering, and the administration of the Airport Improvement Program. Attendant to these programs, and a vital part of them, is our compliance program which is intended to ensure proper maintenance and operation of airports which have federal financial involvement, surplus property programs which provide for the transfer of public lands, and surplus federal property to publicly owned airports. Our data collection program results in the inspection of almost all public airports in the region on a two- or three-year cycle. Information gathered is translated to a Master Record, printed, and made available to airport users.

Manager, Safety and Standards Branch	George C. Paul	ANM-620	431-2630
Secretary (Steno)	Betty C. Strah	ANM-620a	431-2620

STANDARDS SECTION - ANM-621
