

Seattle-Tacoma
International
Airport

International Arrivals Facility (IAF)

January 19, 2022

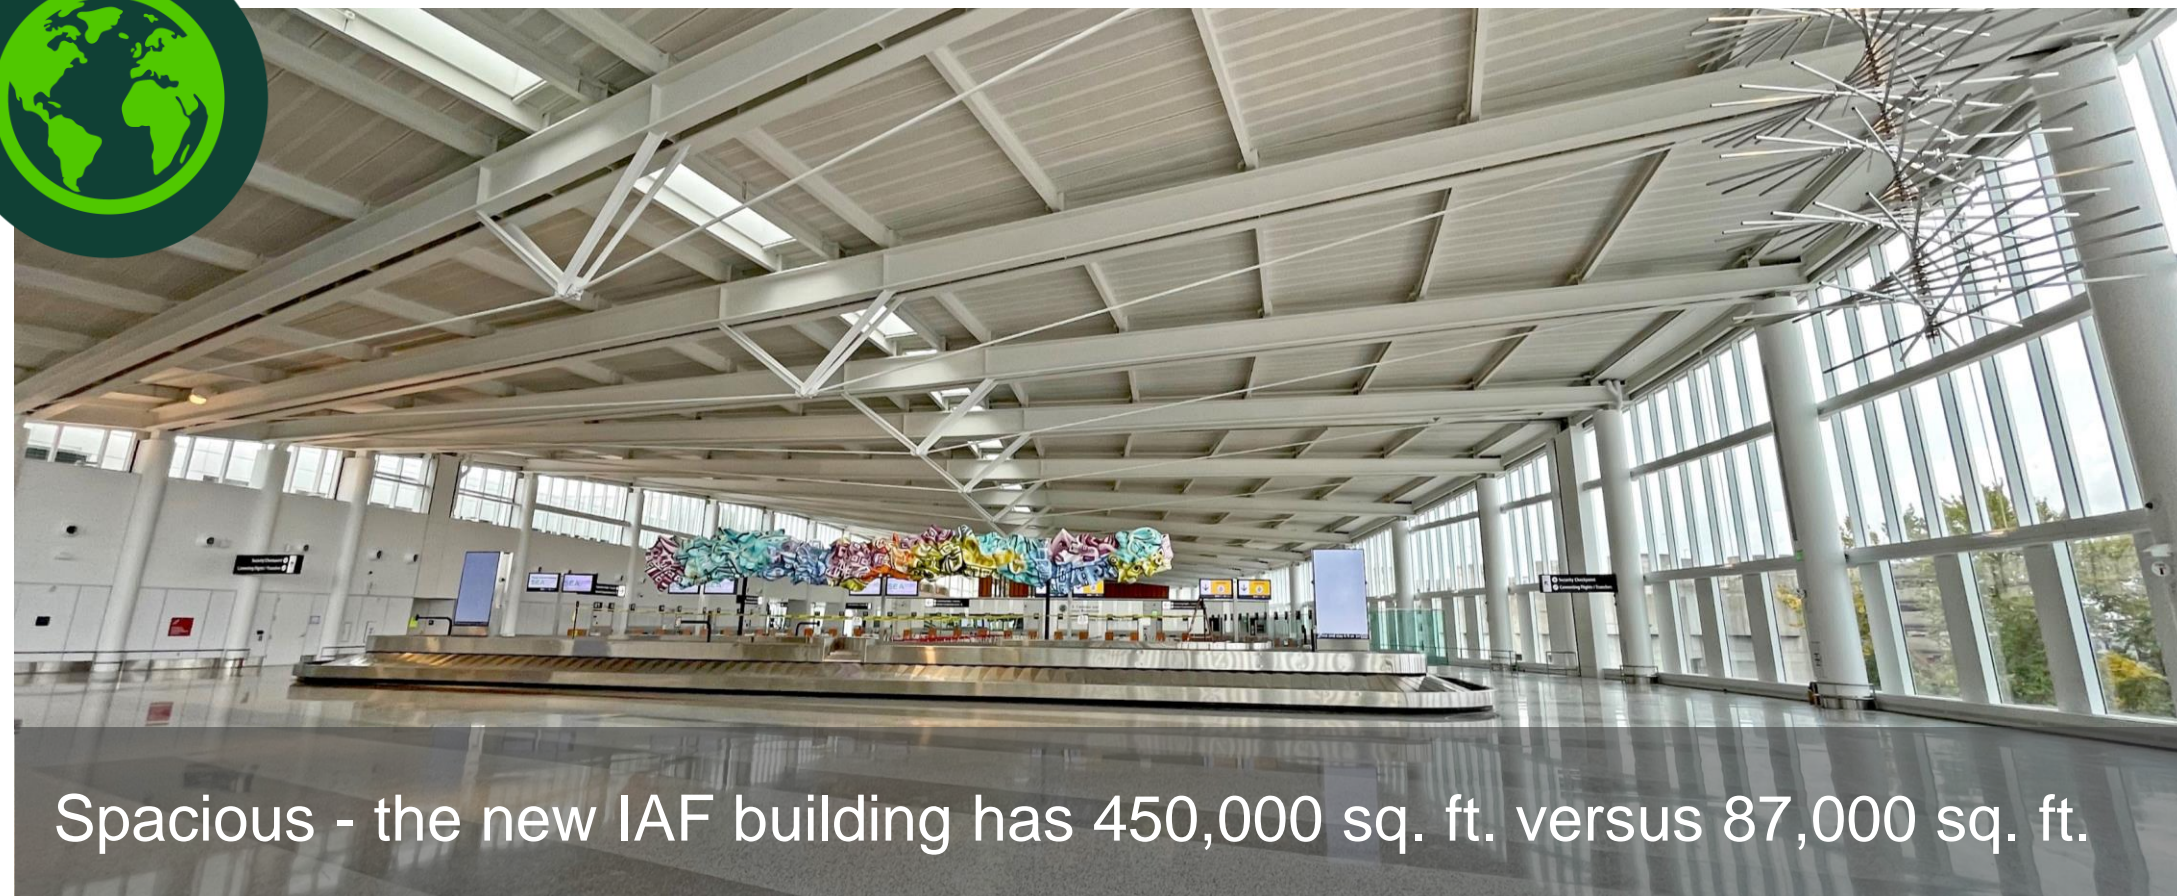

IAF Highlights

The number of international capable gates went from 12 to 20

Went from 4 to 7 baggage carousels with "Bags First"

Spacious - the new IAF building has 450,000 sq. ft. versus 87,000 sq. ft.

Supported over 10,000 jobs on this project during construction

Enhanced Customer Experience Benefits

- Faster access to gates and facility for passengers on arriving flights, connection times drop from 90 to 75 minutes
- Simpler, more secure "bags first" arrival process reduces passenger stress
- Expansive interior eliminates crowding, allows for faster processing of more guests

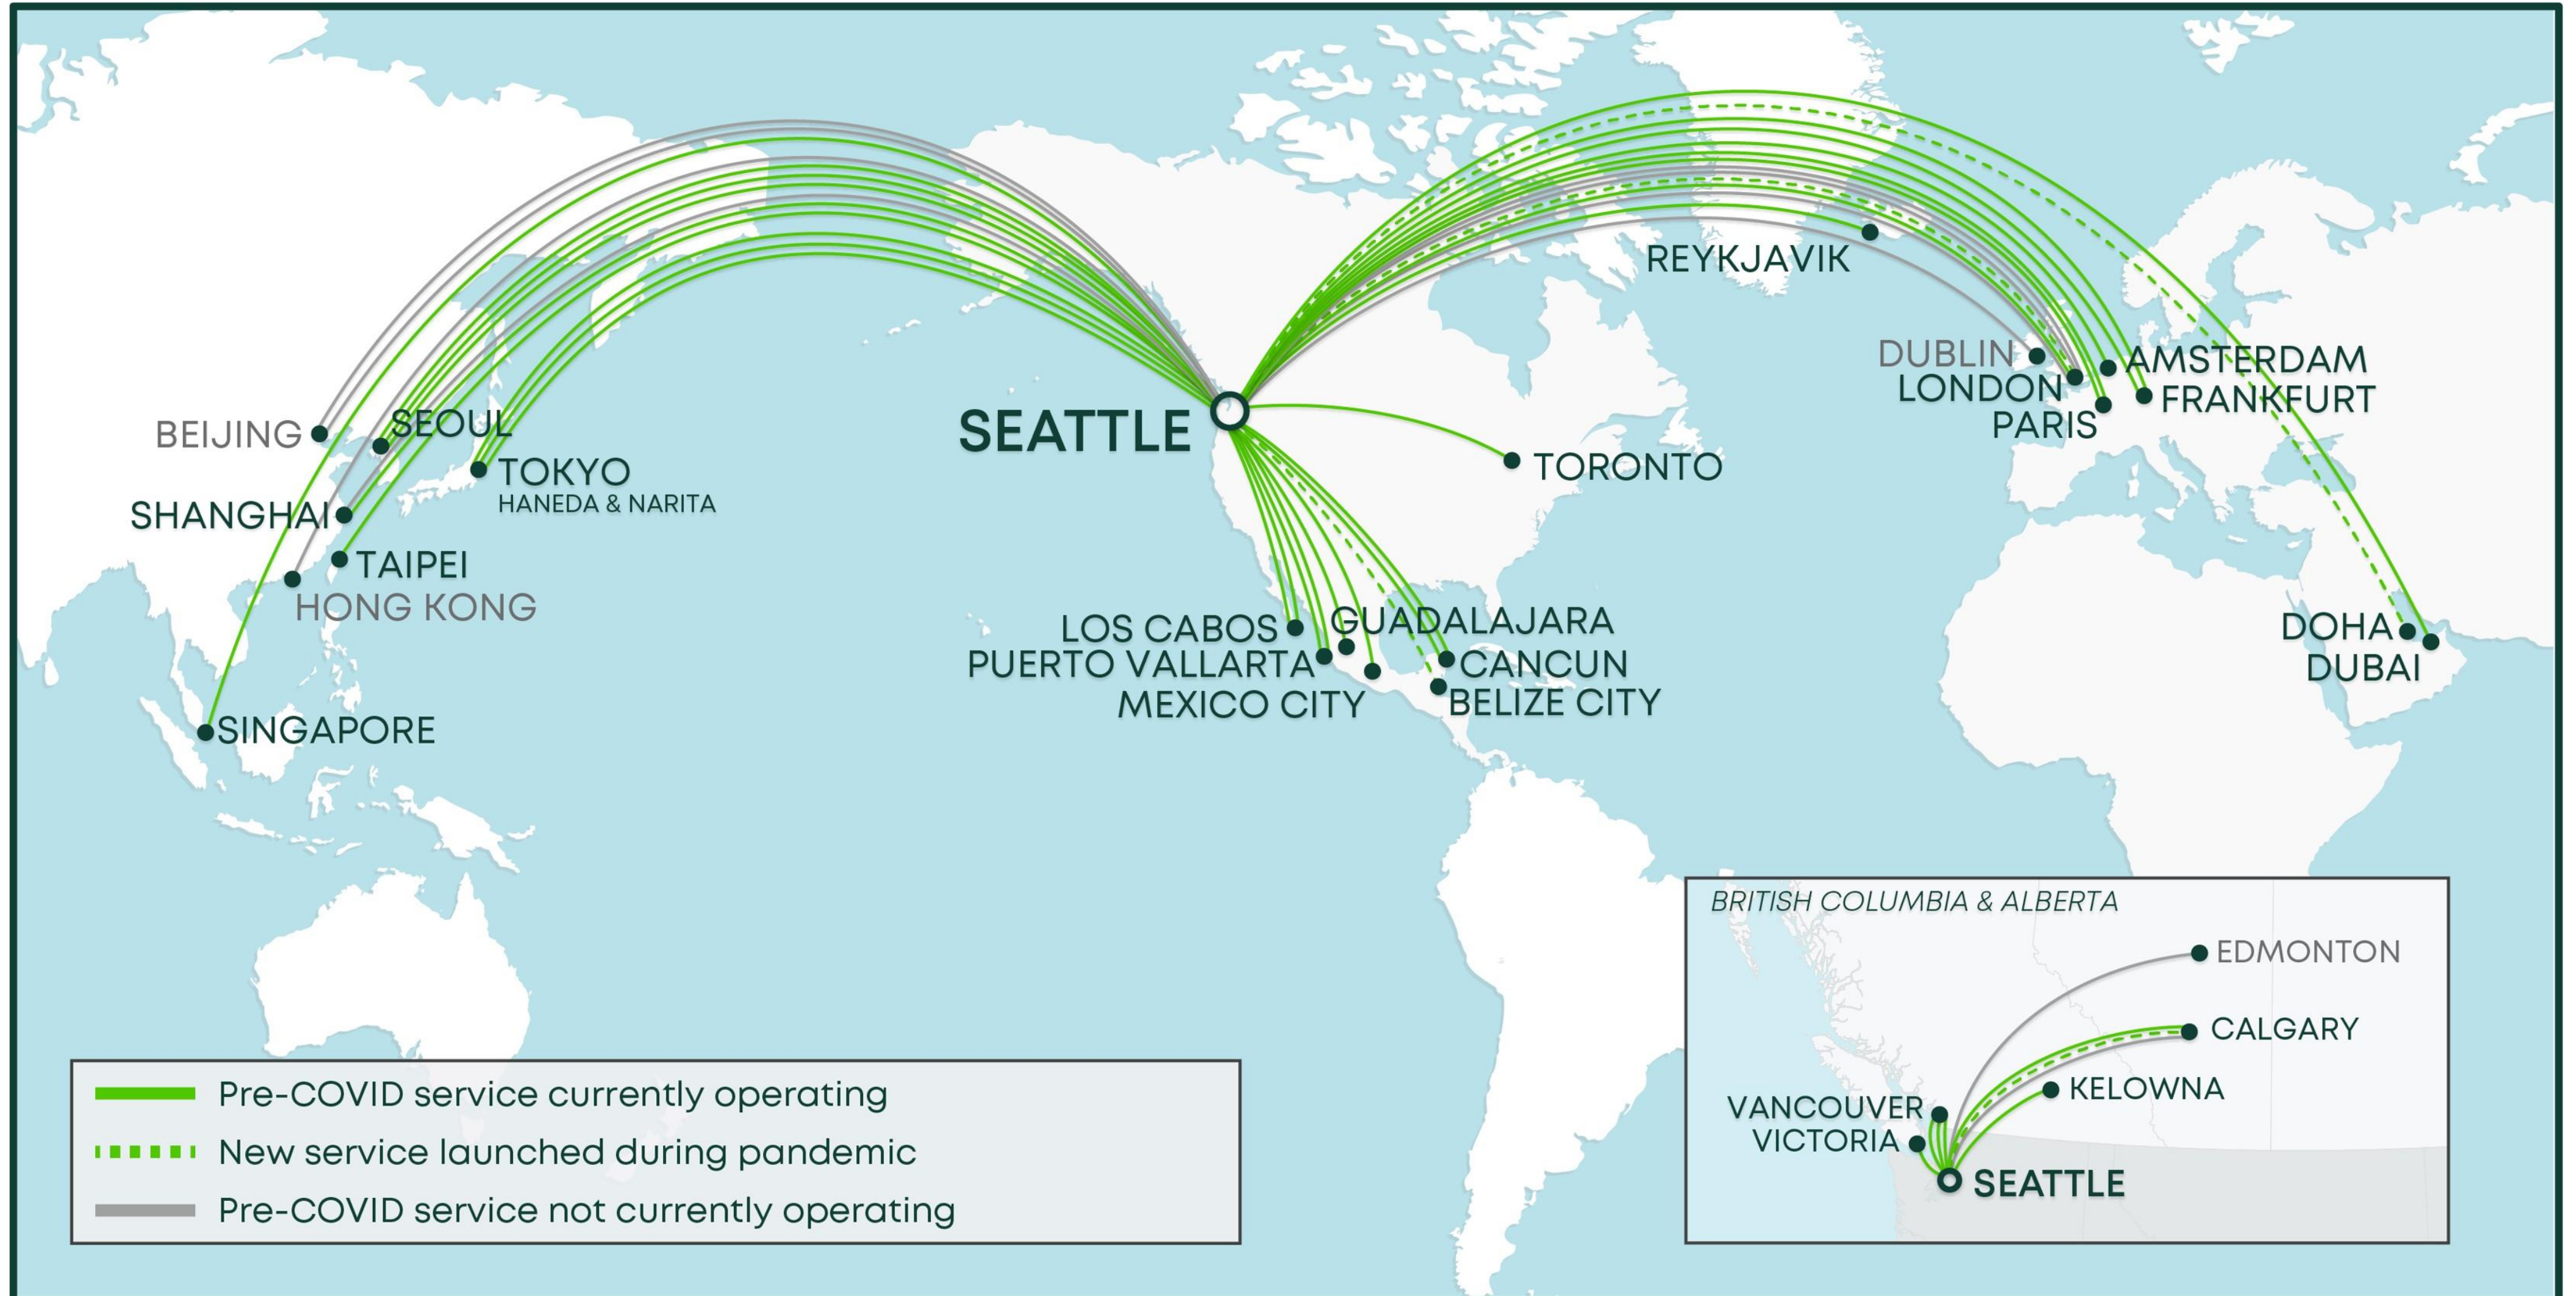

Economic Development

- SEA is a gateway for continued economic development in the region
- SEA Airport accounted for \$3.6 billion in direct earnings and \$22.5 billion in business revenue in 2021
- The airport generated 151,400 jobs, including 87,300 direct jobs making it one of the country's largest job centers
- In (pre-pandemic) 2019, SEA was the eighth busiest airport in the U.S.

SEA's International Services

- Aer Lingus
- Aeromexico
- Air Canada
- Air France
- Alaska
- American
- ANA
- Asiana
- British Airways
- Cathay Pacific
- Condor
- Delta
- Emirates
- EVA
- Hainan
- Icelandair
- Japan Airlines
- Korean Air
- Lufthansa
- Norwegian
- Qatar Airways
- Singapore
- Virgin Atlantic
- Volaris
- WestJet

“The much-anticipated opening of SEA’s International Arrivals Facility is a major advancement in facilitating and welcoming international visitors to our state. The longer trip stays and greater expenditures of these visitors make them especially impactful to our tourism economy.”

**-David Blandford, Executive Director
State of Washington Tourism (SWT)**

Passenger Journey

International Arrivals
Facility

Passenger Walkway

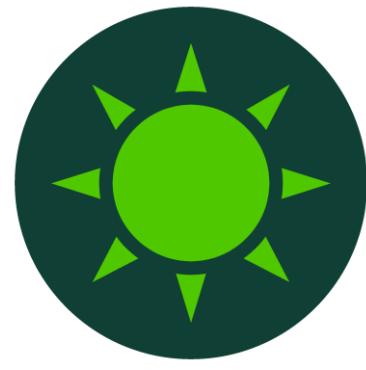

IAF's Iconic Passenger Walkway

Sustainability

Environmental Features

Natural light

Two-thirds of building has daylighting to connect travelers to outdoors, reinforce circadian rhythms, and reduce energy consumption

Low-flow fixtures

Low-flow restroom fixtures to reduce indoor water use

LED lighting

Energy-saving features like LED lighting, energy-efficient escalator motors and variable speed motors on baggage handling devices

Eco-friendly waste management

About 90% of construction waste was diverted from landfills.

Low-emitting materials

Low-emitting products were used for this project including adhesives, materials, and coatings in construction.

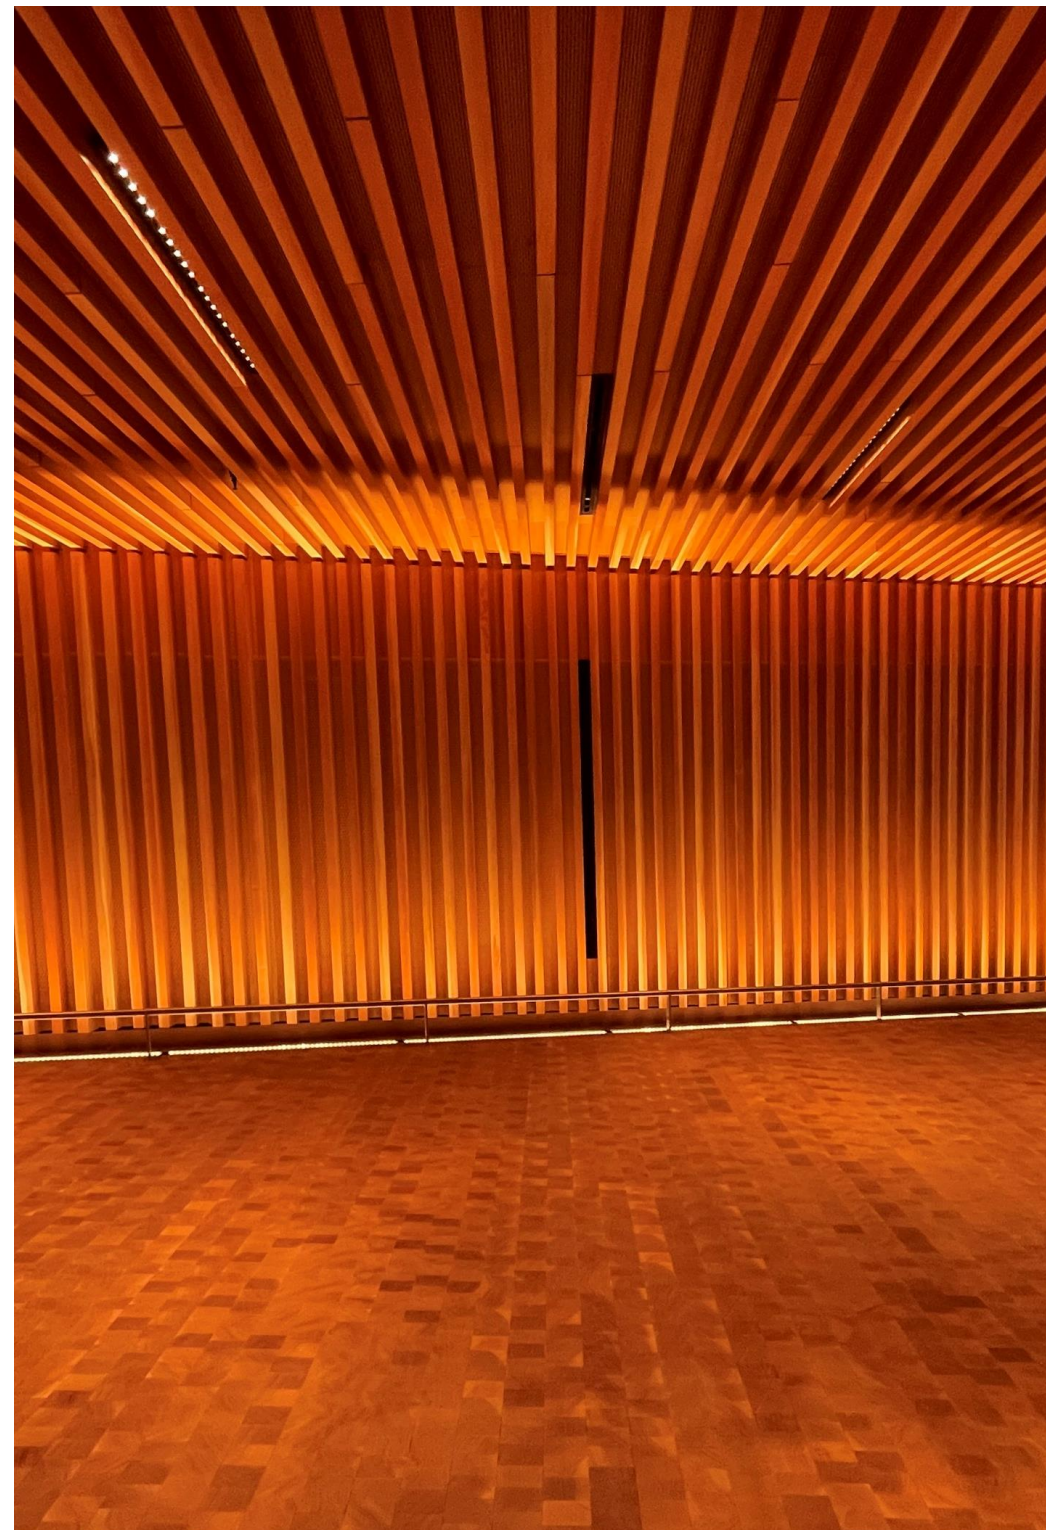

LEED V4 Silver

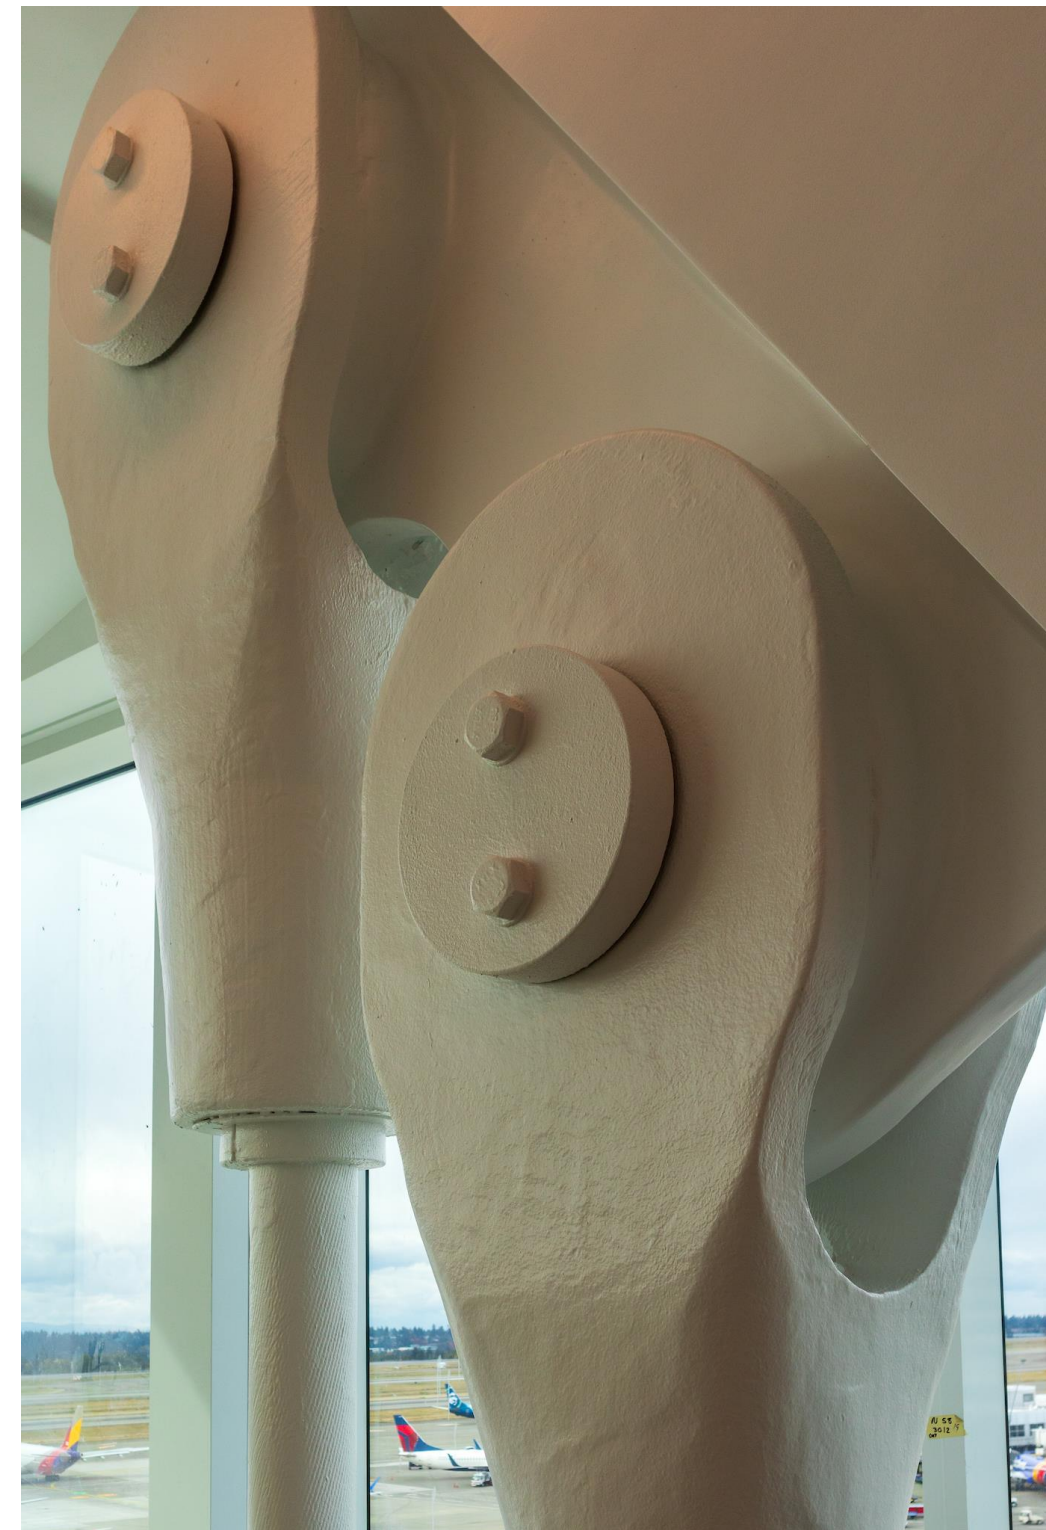

This project is designed to achieve LEED V4 (Leadership in Energy and Environmental Design, Version 4) Silver certification.

Architecture and Art

Architectural Elements

Natural elements and wood accents

Industrial finishes in Passenger Walkway

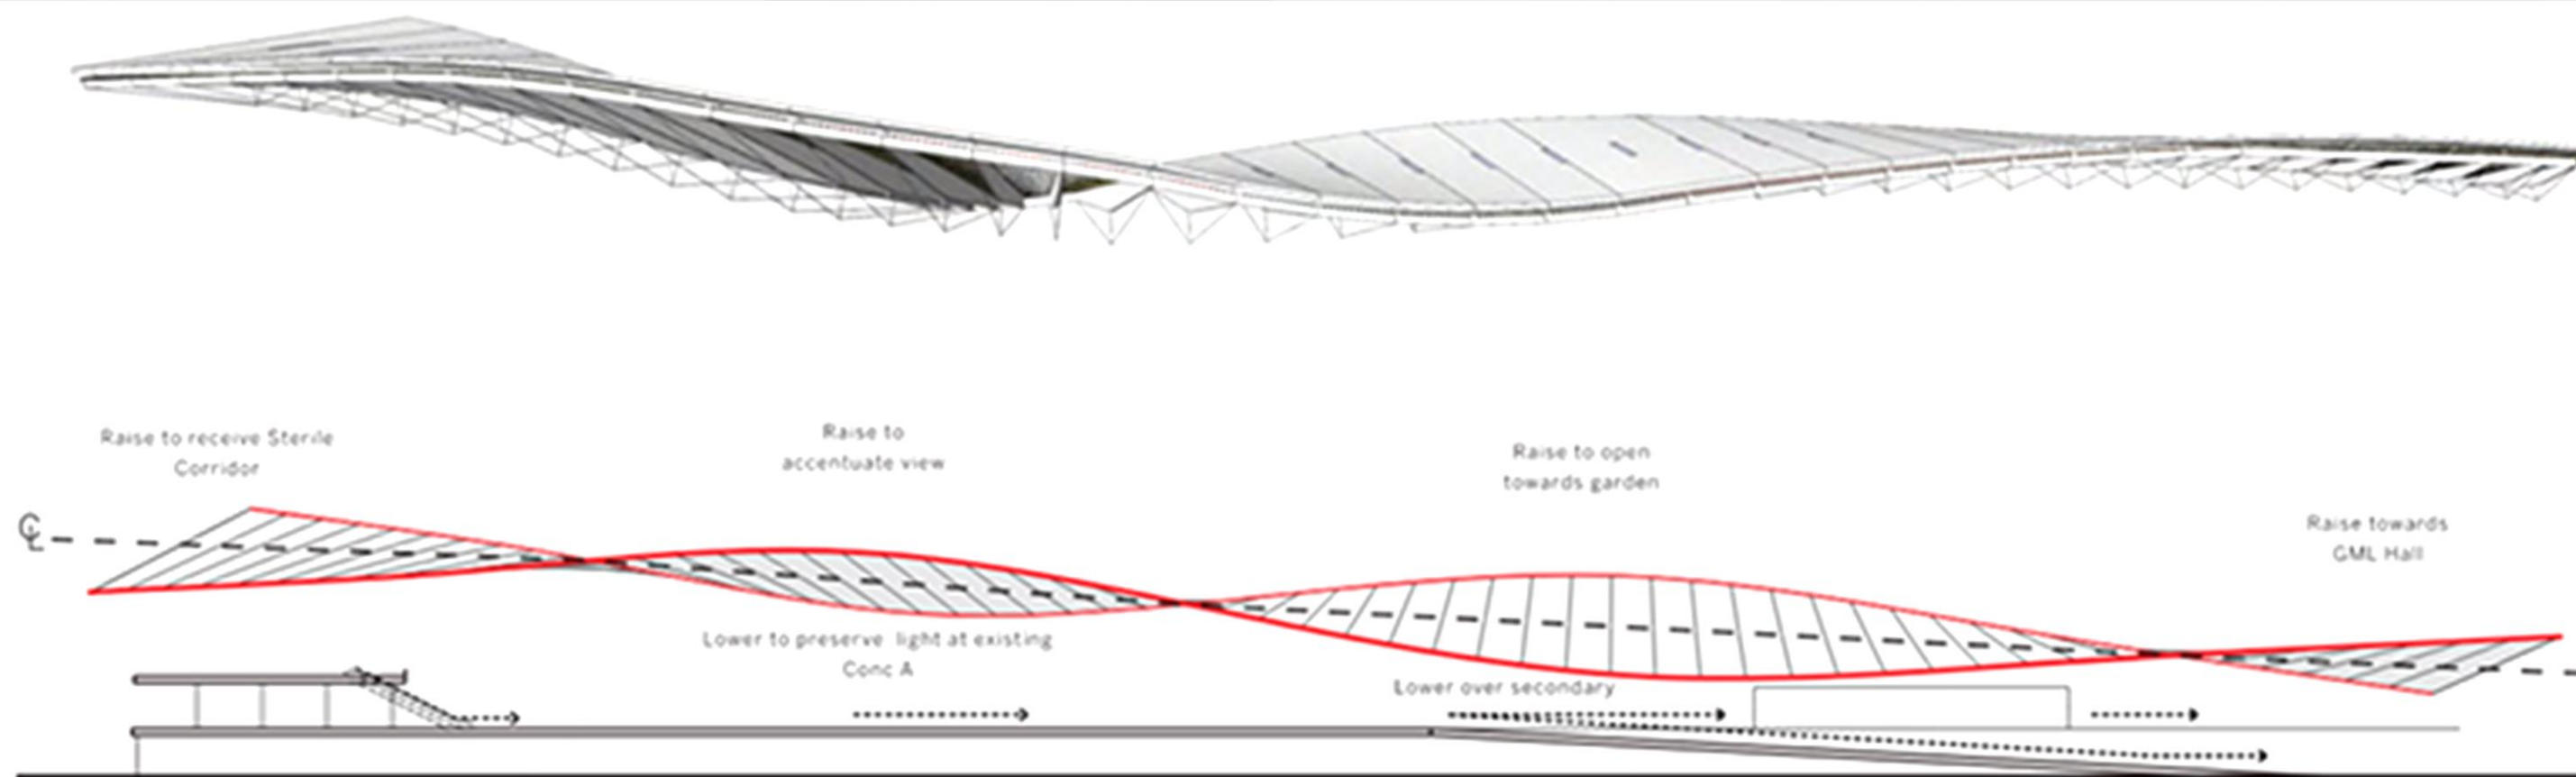

Topographic map of the Pacific Northwest

Natural light with floor to ceiling windows

Architectural Elements

Roofline → replicated the wings of an aircraft tilting to come in for a landing
