**Subject:** RE: Low Flow Meeting

Hi Kelly, Keith, Ann & David:

I just spoke with Keith. Keith and Ann need to talk - both about the agenda for this meeting and about your potential role in the meeting. My understanding from Keith is that Ann is out until Monday, and he intends to talk to her then.

I think it is best if they talk, confirm the meeting, and then brief you and I both on the goals for the meeting and our involvement. Lets keep the meeting blocked out on our calendars for now, until we hear from Ann/Keith early next week.  
Hope that makes sense,  
All the best - Kate.

Hi Kate -

Can someone please provide me a meeting agenda, or at least a precise description of the purpose and expectations of this proposed meeting. My management believes we are done with technical issues. I have heard various things from various people, but the last thing I saw documented would not require a meeting to discuss technical issues.

---Kelly.

It looks like we are firming up the October 30th meeting date. Ann is out of town until Monday (10/22), so I still need to confirm with her. Rick is not available, but since his part of the analysis is unchanged, his attendance may not be critical. If it is, someone else from his office could attend. The CORPS hydrologist may also attend the meeting, but that is not confirmed yet. Location is still slated for Kate's office, unless we conflict with a baseball game, in which case we will move the meeting. I'd like to propose an 8:30 start as some of us have noon meetings to get to. I will send a confirmation or reschedule notice as soon as I talk to Ann. Tom, could you continue to coordinate with Joe and Felix? Thanks.
