Corps. issues

- ① functional assessment is not replicable  
she is now looking at the raw data  
to see if it is similar
- ② adaptive management she is concerned
- ③ sewer lines she is worried to about
- ④ upper water shed she is concerned no  
mitigation

through adaptive management may

Lisa Scott - hydrologist w/ Corps looking  
at hydrology of wetlands

Ann said there appears to be a loss of 1/10 of a  
CFS -

Temporary impacts -

stockpile soils - add microbes or perm. impact  
p. 9 of AZOUS comments

revised performance standards - Jim is working on it.

require buffers bigger - on which wetlands  
in Barrow area 3 - up slope

Das Moines Dr. wetland - no wetland shown

120' Barrow area 3 - where the drainage
