Subject: Low Flow meeting - 11/30

Keith and Ann have confirmed a low flow meeting to be held on 11/30, Tuesday, from 8:30 - 11:30 at my office. If, perchance, there is a baseball game that day, we will find another location.

Meeting agenda includes:

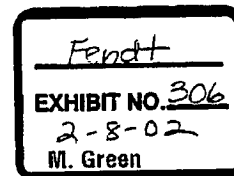

- Briefing re: low flow modelling error and ramifications
- Briefing re: revised modeling and effects on low flow reserve vaults
- Discussion re: potential additional changes that could be made in modelling per Norm Crawford review
- Schedule and deliverables

Kelly - my understanding is that Ann and Joe Brascher will both be calling you in advance of the meeting to discuss.

Directions to our office can be found on our website:
www.fsmseattle.com

See you Tuesday morning -

Kate Snider, Principal

Subject: Low Flow Meeting

It looks like we are firming up the October 30th meeting date. Ann is out of town until Monday (10/22), so I still need to confirm with her. Rick

is
not available, but since his part of the analysis is unchanged, his
attendance may not be critical. If it is, someone else from his office
could attend. The CORPS hydrologist may also attend the meeting, but
what
is not confirmed yet. Location is still slated for Kate's office,
unless we
conflict with a baseball game, in which case we will move the meeting.
I'd
like to propose an 8:30 start as some of us have noon meetings to get
to. I
will send a confirmation or reschedule notice as soon as I talk to Ann.
Tom, could you continue to coordinate with Joe and Felix? Thanks.
