DEPARTMENT OF ECOLOGY
NORTHWEST REGIONAL OFFICE
SHORELANDS AND ENVIRONMENTAL ASSISTANCE PROGRAM

December 7, 2001

TO: Steve Alexander, Manager
Toxics Cleanup Program

VIA: Jeannie Summerhays, Manager
Shorelands and Environmental Assistance Program

FROM: Ann Kenny, Senior Permit Specialist
Shorelands and Environmental Assistance Program

SUBJECT: Request for review by Ching-Pi Wang

The Northwest Regional Office Shorelands and Environmental Assistance Program is in the process of reviewing materials submitted to it by the Port of Seattle in accordance with the requirements of the Section 401 Water Quality Certification it issued for the proposed third runway and associated projects.

We recently received a monitoring plan entitled *Third Runway Embankment Seepage and Groundwater Monitoring Plan*, submitted by Port of Seattle, on November 16, 2001. Ecology needs to review and approve the plan.

Ann Kenny gave the report a quick review and determined that we need the expertise of a hydrogeologist familiar with conditions at the Seattle-Tacoma International Airport.

We would like to request that Ching-Pi Wang review the monitoring plan and provide Ms. Kenny with comments regarding its adequacy and any recommendations for changes he determines are needed. Ms. Kenny has already provided Mr. Wang with her initial impressions of the monitoring plan as well as a copy of the plan.

I am requesting that Mr. Wang provide Ms. Kenny with a memorandum with comments no later than January 18, 2002.

Thank you for your assistance in this matter.

cc: Ching-Pi Wang
