Subject: FW: DRAFT Low Flow Analysis Meeting Notes from October 30, 2001

HW

ow/Flow errors
 to 103001draft..

Ann X will provide copies of this to ALL

Per our brief conversation last Friday, attached is a summary of business from the low flow analysis meeting that was subsequently held on Tuesday.

It is reasonable and appropriate for us to consider revisions to the low flow analysis based on correction of previous modeling errors. However, we will require very clear documentation and rationale for any revised deliverable submitted to us, with appropriate backup.

Acceptability of revised modeling will be based on our review of final proposals. (See "Meeting Conclusions")

<<Low Flow errors mtg 103001draft.doc>>

All - attached are draft notes from the low flow meeting held yesterday. Please review these notes carefully and contact Kate Snider with any comments to the notes by Tuesday noon, 11/6/01. Kate will then finalize the notes. Kate would like to appeal to Paul, Joe, Pony and Kelly to assist in making the modeling vocabulary more accurate wherever necessary. Thank you
