**Subject:** Literature search request

Hi Sabina, I have a lit review request:

Project: Port of Seattle 55-2912-01 (we are creating a new task, when you need to charge this, please ask me for the new number)

We need a literature search on best management practices (BMPs) for removal of copper from stormwater. Here are some keywords for starters:

copper (if this doesn't produce much, try the more generic "metals")  
stormwater  
best management practice/BMP  
treatment/removal/recovery  
filter/filtration  
compost/leaf/leaves  
settling  
chemical  
vault  
sand  
pond  
swale  
zeolites/zeolytes (sp?)  
manufactured media  
synthetic media  
ion exchange  
anode/cathode  
Electrodialysis  
resin exchange  
Reverse Osmosis

I realize this is a long word list. If you need some help on word groupings for the search statements, let me know.

Also... Info on a couple documents; please see if we can find these at the library:

Environmental Pollution Control Alternatives: Drinking Water Treatment for Small Communities, EPA / 625 / 5-90 / 025; and Technologies for Upgrading Existing or Designing New Drinking Water Treatment Facilities, EPA / 625 / 4-89 / 023. Both may be ordered free from the U.S. Environmental Protection Agency Office of Research and Development at 513-569-7562.

To a copy of these publications, call the National Drinking Water Clearinghouse (NDWC) at call the NDWC a (800) 624-8301 or (304) 293-4191. The first book, item #DWBKGN09, an 82-page publication, costs \$11.82; and the second, item #DWBKDM04, a 209-page book, costs \$30.0 Shipping and handling charges also apply.
