PMX STAFF MEETING

CLIENT/AGENCY CONSULTATION

MEETING LOCATION _____

PARTICIPANTS _____

• Called Kevin as followup to 3/25/99 meeting to find out:

(a) Who would be assisting him with review of the WER work plan outline, and

(b) Who would need to listen to our approach for the mixing zone study.

• Kevin's responses.

(a) Gary Bailey would help review WER work plan - works with Kandy Marshall.

(b) Norm Glen would review mixing zone approach.

However, Kevin wanted to wait until after the April 1, 1999 meeting before proceeding because: (in answer to my questions & attempts to clarify our position).

(i) He has to have assurance that POS will be meeting AKART at proposed existing outfalls according to the Puget

Sound Stormwater Manual.

PARTICIPANTS _____

(ii) Have to meet the technology stds, or know when those technology stds will be met at existing outfalls.

(iii) Kevin is confident that AKART will be met at new outfalls - that they will be designed to meet treatment BML levels -

but, he doesn't feel he has an answer to whether existing outfalls already meet these or will meet these.

(iv) Cannot use WER or Mixing Zone to get out of meeting technology stds - this is what he thought he heard on 3/25/99.

(v) Kevin views the "triangle" as an approach for meeting WQ stds - not the technology stds.

(v) Once assured that technology stds being met, then can proceed w. meeting WQ stds

(vi) IF PS SW manual says here are the treatment technologies for new outfalls & because this is a large re-development, the same standards apply to existing outfalls - then this is what needs to be done esp. - NPPES permit says ~~PS~~ POS will use the ~~PS~~ PSSW manual.

we agreed to wait until after April 1 before proceeding.
