<b>Total Out-of-Basin Mitigation</b>	<b>65.38</b>	<b>42.91</b>
<b>Total Mitigation</b>	<b>167.65</b>	<b>72.71</b>

<sup>a</sup> Mitigation credit has not been assigned for relocating a portion of Miller Creek channel, instream enhancement projects, drainage channel replacement, Des Moines Creek buffer enhancement, or a \$300,000 trust fund for watershed restoration.

<sup>b</sup> Mitigation areas in the Des Moines and Miller Creek watersheds exceed 102 acres. In-basin mitigation area divided by wetland impact (18.37 acres permanent plus 2.05 acres temporary) provides a 5:1 aerial replacement ratio.

<sup>c</sup> Based on maps of hydric soils, mitigation can be also characterized as restoration.
