Subject: 401/water quality/stormwater...

Hey Lisa –

Could you please review the attached document? It's a draft 3-page memo summarizing a couple of the 401/stormwater issues that came up during the SeaTac review and then again during our WQ Program/SEA Program meeting a couple of weeks ago.

It's my "401-biased" view of the issues, and should not be considered final by any means, which is why I'd like your comments on it – what do you think? Also, I'd rather not alarm too many people with it just yet, so it would be wonderful if you did not distribute it just yet...

Thanks,

Tom L.
