West Side Obawaters - Jan 31, 02

Seps running heavily. Why aren't these called Tributaries?

Why aren't Waters called Tributaries? High flow - how rainfall

Wet 37 at base of ravine - found several "seeps" and "wells" to Miller Creek.

Check photos - fence line is wetland boundary - when includes one on both sides.

Miller Creek at Wet 37 18 - Forested buffer with associated wetlands and flood plain.

Found sign showing boundary of MSE Wall. Excavation  
Daced off about 40ft from creek to sign. Extent  
area wetland fully saturated. Uncertain

EXTENT OF MSE WALL  
EXCAVATION FOR MSE WALL  
BIG DIFF.

Very nice part of creek - Wide natural forested buffer -  
Sedge fern nearby.
