

February 9, 1982

Dear PAC Member:

At the January 14 Policy Advisory Committee meeting a presentation was made, "Kicking Off" Phase II of the Sea-Tac Communities Plan Noise Remedy Program Update. Phase I, the Noise Forecast Update, is undergoing some final modifications and no "contours" are yet available. However to get started on Phase II, the application of our forecast and projected noise environment on current land uses, PAC must assist in developing a citizen involvement effort.

The first meeting of the Task Force from PAC and elsewhere in the impacted community is scheduled for Thursday, February 18, at 7:30 p.m. in the Sea-Tac Administration Office Conference Room. It is hoped that members from PAC, especially the citizen representatives, and those members from local municipalities will also make a special effort to attend. Letters of invitation are being sent to other local organizations as well to assure all persons with ideas about citizen participation in the upcoming planning program can be recognized.

The proposed agenda for the meeting will be:

- Introduction
- Briefing on Phase II Update
- Current Status of the Noise Forecast Update
- Current Environment--Regulations, Funding and Traffic
- Presentation of Potential Citizen Involvement Program
- Discussion of the Draft

We hope to have a recommendation to the Port Commission by March of 1982 so the initial phases of this investigation will play an important part in deciding which direction we need to go. Please help us apply this information about the environment and socioeconomic impacts that we have learned about Sea-Tac during the last ten years. We established a strong and widely accepted program in the Sea-Tac Communities Plan. The time has come for the Port and its neighbors to again join and renew efforts to make Sea-Tac a better neighbor.

Sincerely,

Arthur H. Yoshioka
Special Project Director
