

MEMORANDUM

DATE January 9, 1984

TO Technical Working Committee

FROM Jody Yamanaka, Project Manager *JY*

SUBJECT Airport Noise Remedy Update--Henry M. Jackson International Airport
Community Attitude Surveys

The Community Attitude Survey has been completed. It consisted of three separate surveys: a self-administered survey of August Neighborhood Workshop attendees and two telephone surveys. The complete results are presented in a final report which was prepared by McClure Research Company. A summary of the survey results was distributed to all those on the Update's mailing list which includes all members of the Technical Working Committee. For those who requested a final report at the October 26, 1983 Technical Workings Committee meeting, a copy is enclosed. If other Committee members would like a copy of the report, please call me at 382-3327 to make arrangements for mailing.

These results will be used in the update of the Airport's Noise Remedy Program in a number of ways which will include but not be limited to the following:

- *Evaluate the application of specific noise remedies in specific neighborhoods.
- *Increase the reliability of recommending a noise remedy program which is generally accepted by the community.
- *Improve the effectiveness of our community involvement program.
- *Reflect community attitudes in the development of the Noise Remedy Program.
