

WHY?

Because SeaTac Airport Is Nearly At Maximum Capacity

Take-offs are spaced approximately two minutes apart for safety reasons. Sea-Tac Airport is rapidly reaching its limit of available take-off times.

What Does The Change Look Like?

The maps below depict the number and direction of west-bound take-offs on actual days. The first is prior to July 2016; the second since then.

What Happened To Our Peace And Quiet?

The Federal Aviation Administration (FAA) began directing aircraft to turn immediately after take-off over the Greater Burien Area from early morning until late at night.
